

7 LAYER CLOTHING SYSTEM

L1 – BASE LAYER

Wicks sweat away from the skin to keep you dry. Soft, lightweight, ideal for year-round use.

L2 – MID LAYER

Retains warmth while managing moisture. Perfect for layering in cooler conditions.

L3 – INSULATION LAYER

Provides warmth with minimal bulk. Can be worn under field uniforms or outer layers.

L4 – FIELD WEAR

Wear/injury resistance and camouflage. Suitable for dynamic field conditions in all seasons.

L5 – THERMAL SHELL

Retains body heat in cold environments. Easily added over field wear when temperatures drop.

L6 – WATERPROOF SHELL

Protects against rain, snow, and wind. Two-way zippers for heat management.

L7 – CAMOUFLAGE LAYER

Improves visual and NIR camouflage. Can be worn over other layers or gear.
